

**Ted Shuck** has over 35 years of experience in the seismic data collection and processing industry. Ted worked for 3 years with GSI on seismic data acquisition crews in Southeast Asia, the Middle East and Alaska. He then continued to work for GSI for 14 more years in land 3D data processing, as an Area Geophysicist in Southeast Asia, and in reservoir geophysics research. Ted joined Advance Geophysical (Landmark Graphics) in 1993 to work on ProMAX algorithm development. He was the primary geophysical software developer at Landmark for years, concentrating on noise attenuation methods, multiple removal, AVO, interpolation and regularization, wavelet processing and residual statics algorithms. Ted holds a Ph.D. degree in geophysics from the Colorado School of Mines.
